We hope you enjoy your experience today.

Career in Tech, Tips:

- **Start Early:** Preparation for this career takes time, it's never too early to start learning!
- **Solve Problems:** Whether it's math, puzzles, programming, or making simple day-to-day tasks easier, the tech industry is all about solving problems.
- **Track Your Progress:** Employers want to know what you've been up to. You might not remember so well if you're nervously interviewing. Write it down or blog about it as you go!
- **Team up with Friends:** Starting a team project can be fun and rewarding. Not only can you tackle larger problems if you work together, but you also gain experience in working as a team. Tech employers look for project collaboration when hiring!
- **Consider College:** Today's generation has a lot of skepticism about rising college expenses, but many businesses in the tech industry still require a four-year college degree.
- **Have Fun:** Technology can be complex, but practice doesn't have to be boring. Make games, create your own website, build technology that matters to you!
